

**The Peak Performance
Backcountry Tour for the Cure**

The Hypodermic Needle is a 50 degree, 2300 vertical-foot chute deep in the heart of the Wasatch's backcountry. Our group of local women skiers will spend two days touring, camping, and descending this notorious chute in the hopes of raising money and awareness for Komen Salt Lake City. Each pledge for our adventure is one step closer to a cure. Thank you!
